## EXPERIENCE

### Software Developer

#### The Organic Box

June 2020 – Present      Edmonton, Alberta

- Create responsive web designs on the Shopify platform using HTML, CSS, Liquid and Javascript
- Write complex Django apps following community development best practices as well develop in house software in Flutter
- Help architect scalable solutions and performance-test applications to find and eliminate bot
- Identify, prioritize, and correct issues on websites or applications that we maintain
- Implement and maintain the use of common third party APIs using REST
- Help set up and run projects in production environments on Linux (Ubuntu-flavour) with Nginx, UWSGI, PostgreSQL, Celery, Redis, AWS and other tools frequently deployed alongside Django web apps

### Software Developer

#### Park Derochie Inc.

May 2018 – August 2018      Edmonton, Alberta

- Worked with SQL, Microsoft Access and SSRS to create reports that contained data for company to use in payroll or other departments.
- Migrated Access reports to SSRS and implemented a UI design by adding buttons and a menu that a end user could use.
- Experience with performance analysis, optimizations and benchmark evaluations on SQL.

### Web Developer Intern

#### Web3

July 2019 – September 2019      Edmonton, Alberta

- Utilized HTML, CSS, JavaScript and Wordpress to create responsive designs to make websites
- Perform tests to ensure cross-browser compatibility
- Connected graphic design to functionality and technical operation
